

GREEN SCREENING

PLANTS TO AID SOCIAL DISTANCING
IN THE WORKPLACE

PLANT
DESIGNS

In these difficult times, we know that your main concern is creating a safe and healthy workplace for your employees to return to. As well as removing harmful toxins from the air, plants provide ample opportunities for creating 'soft' dividers in your office, promoting social distancing and safe traffic flow from space to space.

Our green screening options will aid social distancing in the workplace, with a built-in maintenance service to ensure the plants are healthy in their new surroundings. Rental and maintenance contracts start at just £55 plus VAT per month, providing a hassle-free option to help you and your team adapt to this new way of working.

MOVABLE SCREENING

Movable planters offer a flexible way to divide up your office, enabling you to safely delineate workspaces, meeting areas for small groups, and safe walkways from place to place. Double-sided to create a lush stylish feel on both sides.

MOVABLE SCREENING

Our moss walls are another modular option that can aid social distancing, clearly marking out separate spaces within your office. These double-sided walls are perfect for areas with little natural light as they are made entirely from preserved moss species.

BARRIER PLANTING

Barrier planting is a natural way to create smaller areas within an open-plan office. These dividers are available in a variety of finishes to match any décor scheme, and with planting species whose height and breadth matches your requirements.

GROUPED PLANTING

Floor planting displays are not only an attractive addition to your office, but also create soft barriers that can reduce close contact between employees in walkways or open areas.
