

BLOOM

BY PLANT DESIGNS

HOW DOES BLOOM WORK?

It's pretty simple, really. Bloom is our subscription programme, offering flowering plants for your workspace on a rotational basis.

Our Bloom programme contains seven distinctive ranges, each with its own unique look and feel. Once you choose your range and size requirements, our talented team will design a stunning display made from plants that are in season at that time of year. This means that none of our arrangements are 'one size fits all', or 'off the shelf' - you can sign up to Bloom knowing that you're getting something truly individual.

Ordering your Bloom subscription is easy:

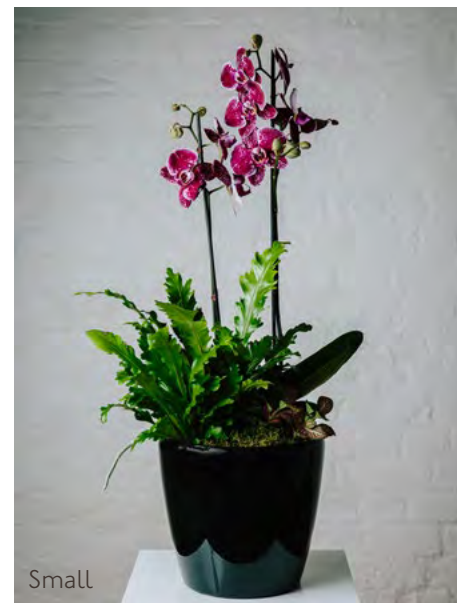

1. Choose your range
2. Choose the size of your display

And that's all there is to it! Of course, if at any stage you wish to change your display options or add in something larger to mark an occasion, your client manager is on-hand to help.

It's time to Bloom.

JUNGLE

Luscious, leafy, and brimming with colour, our 'Jungle' range is evocative of a tropical rainforest. Just decide on the size of your arrangement, the type of flowering plants and our talented team will do the rest.

'Jungle' displays feature sculptural blooms and luscious underplanting in a rich range of shapes and textures that mirror those found on the rainforest floor. This range comes in small, medium and large or extra large, and can focus on either orchids or flowering bromeliads

GREENHOUSE

For fans of a more minimal look, our 'Greenhouse' range is the perfect choice. With sculptural stems and a more limited colour palette, it is guaranteed to bring an air of elegance to any space. Just decide on the size of your arrangement, the type of plants and our talented team will get to work.

This range comes in small, medium, large or extra large and can focus on orchids, succulents, or flowering bromeliads. The plants and pot change with each monthly rotation.

TERRARIUMS

Playfully sophisticated, our terrariums are miniature biomes contained in a handpicked glass container. Container options include fish bowls, jars, low bowls, and bottles. This range comes in medium size (large statement displays available on request) and are planted with elegant succulents.

CONNECT

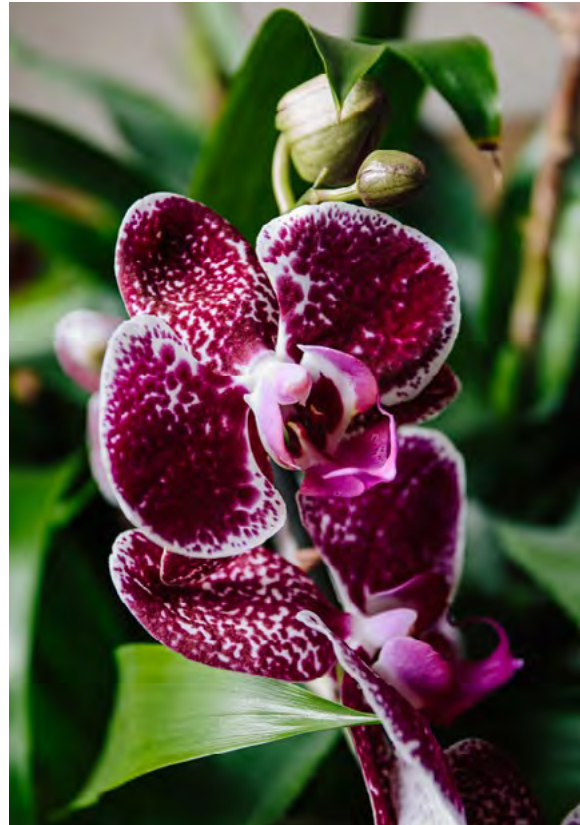

For those board room meetings and coffee table chats, we understand that plants (as wonderful as they are) can sometimes get in the way. Our 'Connect' range is designed to work around this, with low planting and bowls that won't impede any face-to-face contact.

We have many bowls and boats available and will always do our best to include your favourites in your rotation.

Each display in the 'Connect' range is no taller than 45cm.

TABLE TOP

If you're looking for something on the smaller side, our table top range was made for you. These displays may be little, but they're guaranteed to have a big effect on your space. Each display is no more than 15cm wide and 25cm in height, and features either succulents or colourful flowering plants.

SEASONAL

VALENTNES

SPRING

SUMMER

AUTUMN

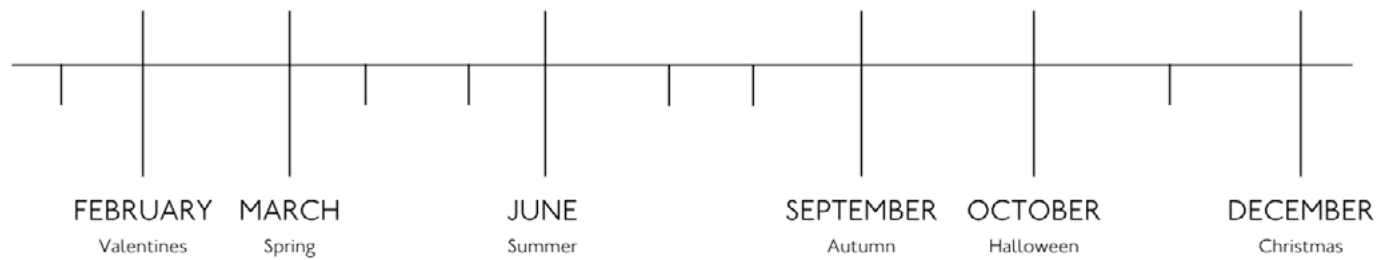

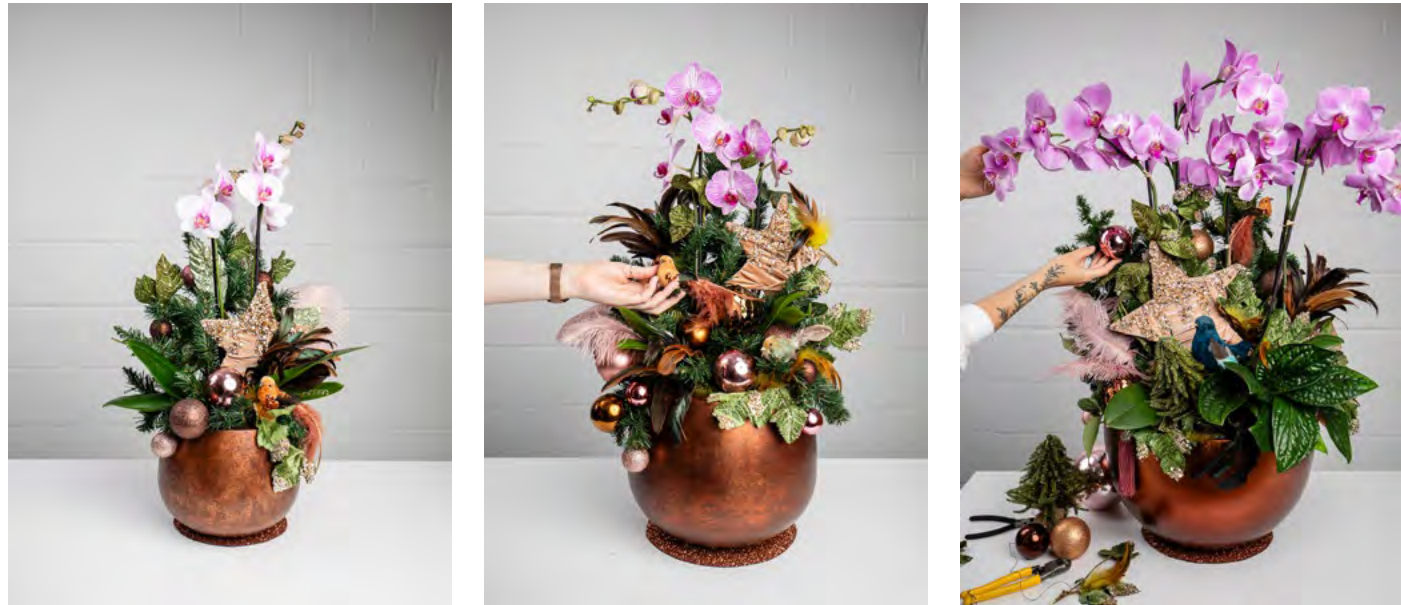

HALLOWEEN

CHRISTMAS

We can offer a range of displays to mark occasions through the year. From Spring to Winter, you can celebrate with a fresh living display. With this option you can mix it up through the year getting six seasonally themed displays included in your montly rotation - Valentines, spring, summer, autumn, Halloween and Christmas.

All seasonal Bloom displays come in three sizes, small, medium and large. They all incorporate beautiful design details and fresh blooms, at different scales to best fit your space. Help mark the seasons each quarter as well as showing the love for Valentines and marking spooky season. Inbetween these seasons you will have a lush jungle display.

SCALE UP

We can offer larger scale displays that take key seasons to a whole new level. Make the reception desk a real focal point for guests and colleagues alike. No matter what the season or celebration, we can make something that will stand out.

GO LARGE

Want to get people involved? We can also build larger scale interactive displays, to encourage people to stop, sit or take photos, feeling part of the celebration. Talk to us about your ideas and we can help you bring it to life and take your event to the next level.

HANDMADE & DELIVERED

Bloom displays are handmade and hand delivered by our talented team. They are made in-house, delivered with care to your building by our friendly installations crew then cared for onsite by trained horticulturalists.

Our displays are a cost effective alternative to cut flower deliveries as they last for a month rather than a week. This also means they are gentler on the planet, creating less waste.. All plants are re-homed or composted when your display is changed over.

OUR SERVICES

We offer a full range of horticultural services to clients across London.
